SKILLS SUMMARY

- **Languages:** Python (Proficient), Java (Good), SQL (Good)
- **Frameworks & Libraries:** React.js, Node.js, FastAPI, Flask, LangChain, Bootstrap, HTML5, CSS3
- **AI/ML:** Generative AI, Machine Learning, Deep Learning, NLP, RAG, Semantic Search, AI Agents
- **Databases & Tools:** MySQL, Git, GitHub, VS Code, Google colab
- **Cloud & Deployment:** Vercel, Render, Streamlit, REST APIs

EDUCATION

- **Kalasalingam university** Tamil Nadu, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.84 September 2022 - April 2026
Favorite Courses: Artificial Intelligence, Machine learning, Natural Language processing, Object Oriented Programming, Data Structures & Algorithms
- **Resonance Junior College** Vijayawada, India
Intermediate; Percentage: 78% July 2020 - March 2022
Favorite Courses: Physics, Chemistry, Mathematics
- **Narayana e-techno school** Tadipatri, Andhra Pradesh
SSC(X); Percentage: 100% April 2019 - March 2020

PROJECTS

- **AI-Powered Semantic Candidate Ranking System** : Built an end-to-end semantic candidate ranking system capable of processing and ranking 100,000 candidate profiles against a job description. Implemented Job Description parsing, requirement extraction, semantic matching using embeddings, trust scoring, behavioral scoring, and explainable ranking. Generated Top-100 ranked candidates with detailed reasoning and CSV submission outputs. Tech: Python, Sentence Transformers, NLP, Semantic Search, Machine Learning, Pandas, NumPy
GitHub | Live deployment
- **Skill Ladder - AI Career Development Platform**: Built a full-stack AI career platform with role-based dashboards for job seekers and providers. Implemented AI resume analysis, ATS scoring, skill extraction, and job matching. Developed candidate pipeline management, mock assessment engine, and in-browser code compiler. Tech: Python, FastAPI, React.js, Tailwind CSS, Firebase, PyPDF2, Vercel
GitHub | Live deployment
- **Agent Eval Lab**: Developed a multi-agent LLM evaluation framework using a Generator → Reviewer → Judge pipeline to automatically generate and assess PyTest suites for Python functions. Implemented AST-level quality scoring, Docker-based reproducibility, and CI/CD automation. Tech: Python, LangChain, Groq API, Flask, Docker, PyTest, GitHub Actions
GitHub

ACHIEVEMENTS

- **Springer Nature Research Publication (SmartCom 2026)**:
Published research on AI-powered career recommendation systems based on the Skill Ladder platform.
- **Winner - KARE Open Source Hackathon 2024**:
Secured 1st place among 200+ competing teams by developing an innovative AI-powered solution.
- **Redrob India Runs Data & AI Challenge**:
Built an AI-powered semantic candidate ranking system capable of processing and ranking 100,000 candidate profiles.

CERTIFICATIONS

- Oracle Certified Foundations Associate
- AI for Data Analytics & Power BI - Infosys Springboard
- Learn Java - CodeChef
- Python - oneroadmap
